What is Seavus Project Viewer™

Seavus Project Viewer™ is a stand-alone, low-cost software for viewing Microsoft® Project plans, suitable for all project oriented organizations, from small and medium sized companies to large corporations.

With this software solution you can view the native .mpp file format without the need to have Microsoft® Project installed on your computer.

Seavus Project Viewer™ is available in 11 languages: English, German, French, Spanish, Czech and Japanese, Italian, Polish, Dutch, Russian and Chinese.

By allowing all project members and project executives to view, print and analyze their project plans, Seavus Project Viewer™ enables them to take greater control over project completion and deliver projects successfully.

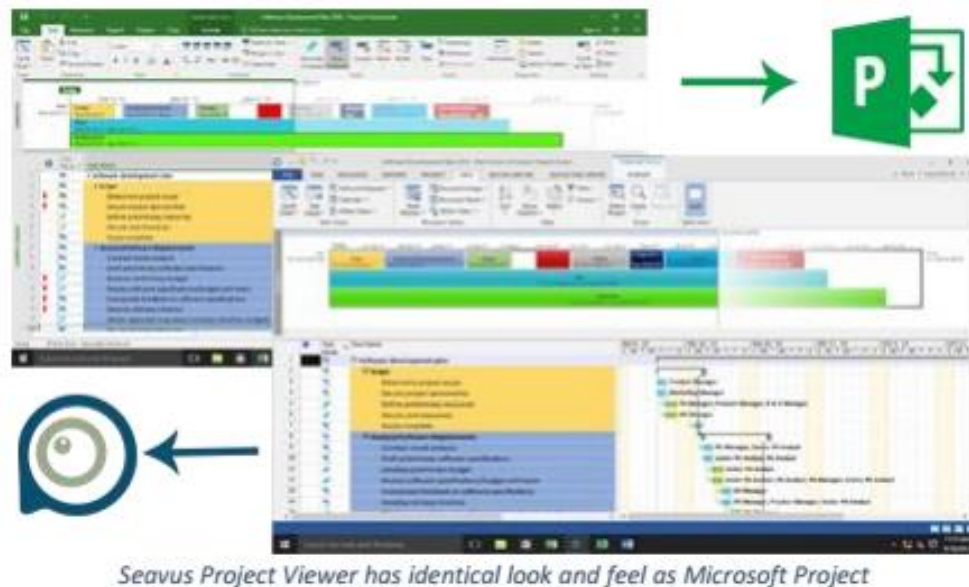

Over 5 million users around the world and over 250 Of Fortune 500 companies use Seavus Project Viewer™.

Some of our enterprise customers: Orange, Xerox, Marks & Spencer, European Central Bank, BMW, Ford Motor Company, Michelin, SAP, Airbus, Westinghouse, Chevron and many others.

Experience the Benefit of Seavus Project Viewer™

Support for Microsoft® Project 2019. Perfect for Windows 10

Seavus Project Viewer™ is the first viewer to implement complete support for **Microsoft® Project 2019**, Windows 10 and Windows Server 2016, providing independence from Microsoft® Project or operating system versions installed.

Professional Graphical Reports as in Microsoft® Project

Get quick overviews of your project in a matter of seconds.

To manage a project effectively, users have the need to communicate different project information to a variety of people and with Seavus Project Viewer™, you can **print different views, tables or reports** that present the exact information you want to show or share.

Seavus Project Viewer™ allows users to view the status of the whole project, the work completion status, resources allocation status and project and resources costs overview **using the: Dashboard, Resources and Costs Reports.**

By using reports that can be generated and customized according to you preferences, even for older Microsoft® Project files, you can **rapidly measure the project progress** and communicate more effectively with your project team.

Using the Time category, users can customize their own graphical reports and monitor how a certain parameter changes throughout the lifespan of the project.

Integration with sharing platforms and online storages for a greater collaboration

Seavus Project Viewer™ enables full support for **Project Plans and Master Project Plans published on Microsoft® Project Server** so you can open, view and print your project plans and Master Project Plans published on Microsoft® Project Server, so that everyone involved can have access to the updated project information.

The **complete Microsoft® SharePoint Integration** enables you to manage all your project plans directly from SharePoint hosted in-house, or to collaborate with team members using the SharePoint in the cloud (**SharePoint Online**) included in Office 365 suite.

Share your project plans by utilizing the integration with OneDrive and allow all the team members to have access to the updated version of your project files.

Identical look and feel as in Microsoft® Project

Seavus Project Viewer™ is the **fastest viewer that opens large and complex project plans** and Master project plans that **supports 100% of the views of any edition of Microsoft® Project** and provides additional custom project views.

Seavus Project Viewer™ substantially decreases the learning curve and lowers the risk of possible misinterpretations by displaying **views, charts, tables, filters and groups exactly as they appear in Microsoft® Project.**

Unique collaboration without server installation

Seavus Project Viewer™ is the only viewer for Microsoft® Project files that provides a collaborative environment for project teams, without server installation. With the **Task update** functionality, teams can easily **introduce a collaborative project environment** where they can:

- Get real-time project status;
- Continually evaluate team's performance;
- Build knowledge for future projects;
- Simplify project collaboration;

- Save time and avoid useless communication between team members and Project Manager.

Top-notch support and security

Considering the security of your project information to be a top priority, Seavus Project Viewer™ provides **opens password protected files**, which will help you to keep your project information from being accessed by unauthorized people.

We are 100% committed to our customer's satisfaction by providing **worldwide customer support** and online help and respond to all customer requests within one business day.
